TutoConnect Software Testing Document

Software Testing Document

Sprint 1

Section 7, Group 4 | Principles of Software Engineering

Document Type	Software Testing Document, Sprint 1
Testing Type	User Acceptance Testing
Testing Approach	Testers view all screens and verify that visible UI elements match what is expected. No backend or data entry is performed during the test. System and integration testing are not applicable to static prototypes.
Mockup Screens	Splash Screen, Sign In, Registration (role selector), Student Registration, Tutor Registration, Recover Password, OTP Entry, Update Password, Search Page, Filtered Results, Filter Popup, Language Dropdown, Subjects Dropdown, Study Level Dropdown, Side Menu
Roles Evaluated	Student, Tutor
Version	1.0

Introduction

Purpose

This document records the results of User Acceptance Testing done on the TutoConnect Sprint 1 prototype mockups. The prototype consists of static screen designs showing the intended UI for each Sprint 1 feature. Tessting is performed by inspecting each screen and verifying that the correct elements are present and functional.

System and integration testing are not conducted at this stage. These testing types require a live backend where flows can be triggered and class interactions can be observed.

Methods

The tester opens the relevant mockup screen and observes what is visible. Each test case states which screen to observe, what elements should be visible based on user stories, and what was observed on the mockup. A pass means that all expected elements are present. A fail meants one or more required elements are missing from the mockup.

Mockup Screens Referenced

- Splash Screen
- Sign In page
- Registration page (role selector)
- Student Registration page
- Tutor Registration page
- Recover Password page
- OTP Entry page
- Update Password page
- Search page
- Filtered Results page
- Filter Popup
- Language Dropdown
- Subjects Dropdown
- Study Level Dropdown
- Side Navigation Menu

User Acceptance Testing

Each test references a specific mockup screen. The tester will view the screen and check whether the listed elements are visible as described.

Test ID	User Story	Mockup Screen	Tested Items	Items Visible	Test Status
1	Splash screen displayed before login or registration	Splash Screen	Splash screen must show: • TutoConnect logo • Tagline • Feature highlights • Create account button • Login button	Splash screen shows: • TutoConnect logo • Tagline • Feature highlights • Create account button Login button • Terms footer	Passed
2	Role selection on splash screen	Splash Screen	Student and Tutor role selector cards must be visible so the user can indicate their role before registering.	Splash screen shows Student card and Tutor card as selectable role cards. Student is shown as preselected.	Passed
3	Role selection on registration form	Registration Page (role selection)	Registration screen must show role selector so users can choose Student or Tutor before seeing role specific fields.	Registration page shows role selector radio buttons. Student is pre-selected. Shared fields visible: • Full name • Email • Username • Password • Confirm Password • Upload Student ID • Institution	Passed
4	Full field set on student registration	Student Registration Page	The form must show all student specific fields: • Learning languages dropdown	Student Registration page shows fields: • Full Name • Email • Username • Password	Passed

			• Subjects of interest dropdown • Level of studies dropdown • Register button • Shared fields	• Confirm Password • Upload Student ID • Institution • Learning languages dropdown Subjects of interest dropdown • Level of studies dropdown • Register button	
5	Subject and language dropdowns show selectable options	Subjects dropdown screen, Language dropdown screen	Subjects dropdown must list subject options. Language dropdown must list language options. Both must show a “More” option	Subjects dropdown shows: • Mathematics • Physics • Chess • History • More… Language dropdown shows: • English • Spanish • Chinese • French • More…	Passed
6	Level of studies dropdown shows academic levels	Study level dropdown screen	Level of studies dropdown must list academic levels.	Study Level Dropdown shows: • Degree • Masters • Phd • Diploma • More	Passed
7	Student ID upload control is present	Student Registration Page	Upload Student ID control with upload icon must be visibe on student registration form.	Upload Student ID field with upload icon is visible on Student Registration Page.	Passed
8	Full field set on tutor registration	Tutor Registration Page	With Tutor selected, the form must show:	Tutor registration page shows:	Passed

			• Teaching Languages dropdown • Subjects Taught dropdown • Upload Qualifications file control • Register button • Shared fields	• Teaching Languages dropdown • Subjects Taught dropdown • Upload Qualifications file control • Register button • Shared fields	
9	Sign in screen elements	Sign In Page	Sign in screen must show: • Username field • Password field • Remember Me checkbox • Login button • Register link • Forgot Password link.	Sign in page shows: • Sign in heading, • Username field • Password field • Remember me checkbox • Login button • Don't have an account? Register', and 'Forgot your password?' text.	Pass
10	Error state when inputting wrong credentials	Sign in page	Error message area or placeholder must be visible on sign in screen to represent invalid credentials feedback state.	No error message or error placeholder is visible on the sign in page. Invalid credentials state is not represented.	Failed
11	Remember Me checkbox	Sign in page	Remember me checkbox must be visible on the sign in screen.	Remember me checkbox is visible in the sign in page.	Passed
12	Forgot Password link on sign in	Sign in page	“Forgot your password” link must be visible on the sign in screen	“Forgot your password” is visible below the log in button in the sign in page	Passed
13	Enter email on recovery screen 1	Recover password page	Screen with an email input field and a Send OTP button	Recover password page shows:	Passed

			must exist as the first password recovery step.	• 'Recover Password' heading • Enter Email field • Send OTP button • 'Already have an account? Sign in' link	
14	Enter OTP on recovery screen 2	OTP entry page	Screen with OTP input and Reset Password button must exist as the second recovery step.	OTP page shows: • 'Reset Password' heading • Enter OTP field • Reset Password button • 'Already have an account? Sign in' link.	Passed
15	Set new password field on recovery screen 3	Update password page	Screen with New password and Confirm password fields must exist as the third recovery step.	Update password page shows: • 'Update Password' heading • New Password field • Confirm Password field • Login button.	Passed
16	Logout in navigation	Side menu	Logout option must be visible in navigation menu for logged in users.	Side menu shows: • TutoConnect header • Dashboard • Search • Log out	Passed
17	Search bar on search page	Search page	Search bar with filter icon and search submit icon must be visible on search page	Search page shows: • Search bar • Search placeholder text visible.	Passed

18	Tutor result card on search page	Search page	Tutor cards must be visible showing: • Name • Subject • Price per hour • Star rating • Short bio	Search page shows 6 tutor card in a 2 column grid. Each card shows: • Icon • Tutor name • Subject • Price per hour • 5-star rating • Short bio text	Passed
19	Filter popup controls	Filter Popup	Filter popup must show: • Subject dropdown • Language dropdown • Min and max price field • Stars control • Apply button • Reset button	Filter popup shows: • Subject dropdown • Language dropdown • Min Price • Max Price • Stars • Apply button • Reset button • X close button	Passed
20	Filtered results shown after filter applied	Filtered results page	Results page must show tutor cards that comply with the applied filter with the search term visible in the search bar	Search bar shows Chess with active filter icon. 6 cards visible, all labelled “Chess instructor” with varying prices and 5 star ratings. Tutors: • Magnus Carlsen • Daniel Naroditsky • Levon Aronian • Kevin Bordi • Judit Polgar • Baadur Jobava.	Passed

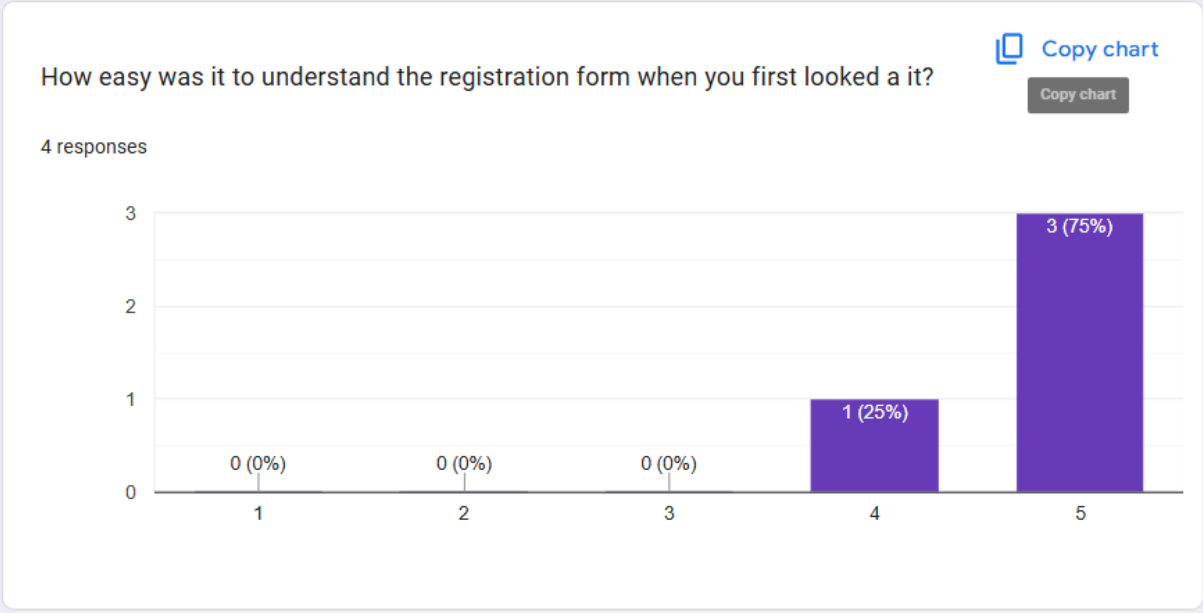
User Feedback

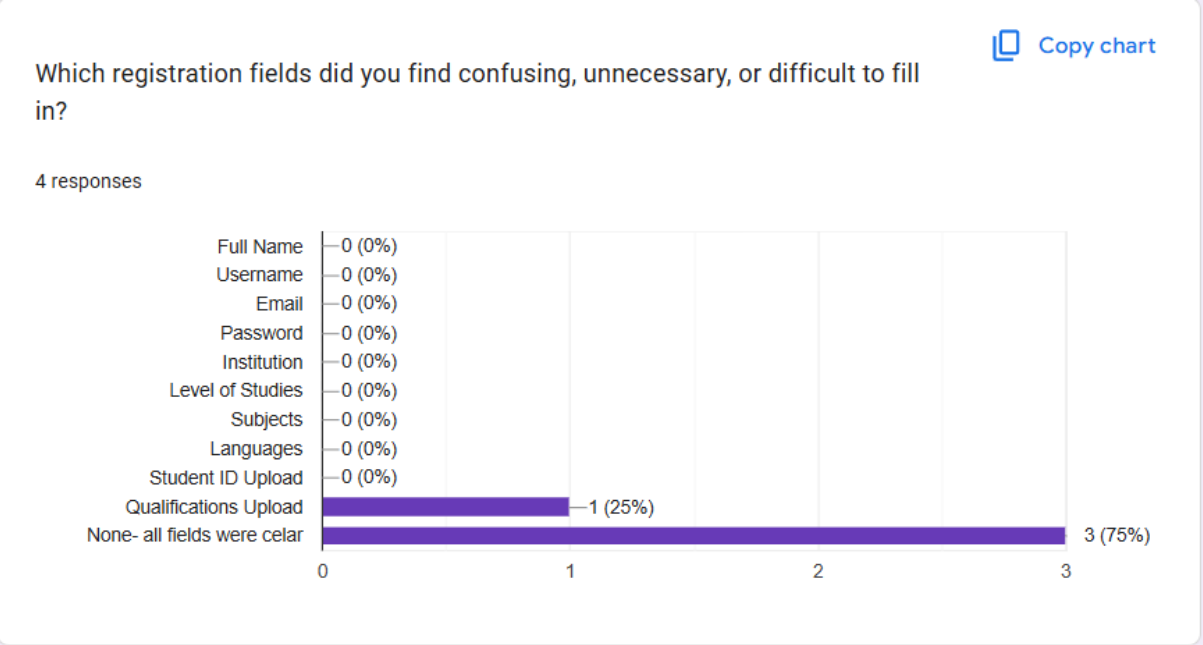
Collection Method

User feedback was collected using the feedback form distributed by Google Forms. Participants were asked to walk though the Sprint 1 prototype screens and answer questions covering the splash screen and registration screens (Section A), the login and session screens (Section B), and the tutor search and filter screens (Section C).

The form was shared with participants after they reviewed the Sprint 1 mockup screens. All responses are recorded in the feedback form using Google Forms. The link for the feedback form is https://forms.gle/fwBvNp6fFhpRS8D87

Sprint 1 Feedback Form Results

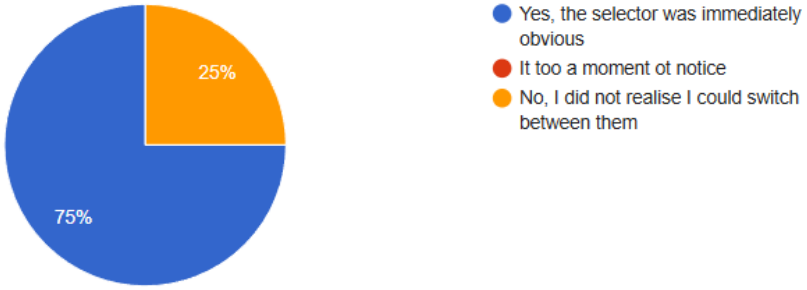




Was it immediatly clear how to switch between the Student and Tutor registration forms using the **'I am a: Student/Tutor'** selector.

Copy chart

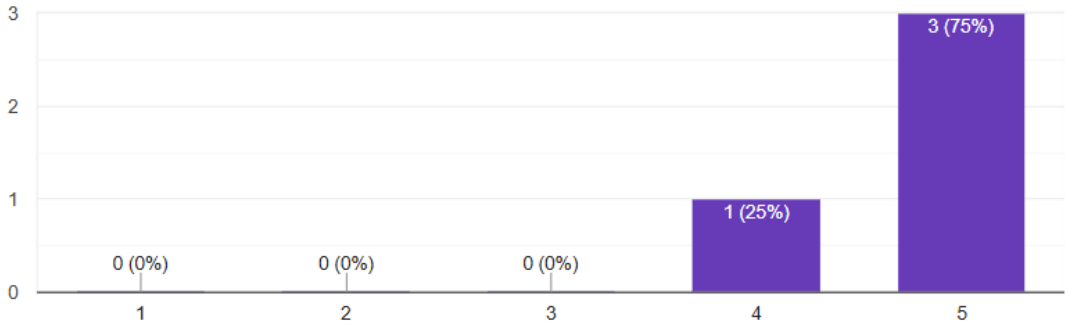
4 responses



How easy was the Sign In scree to understand at a glance?

Copy chart

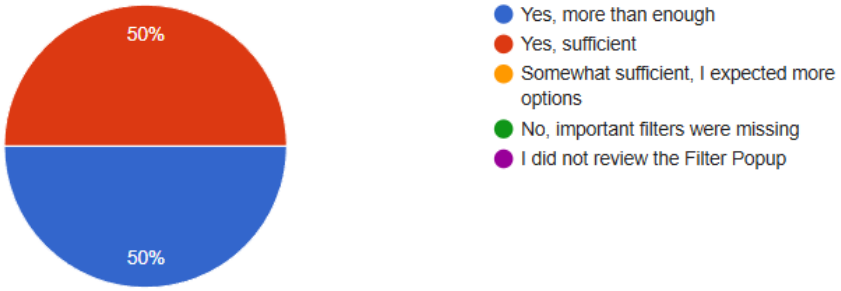
4 responses

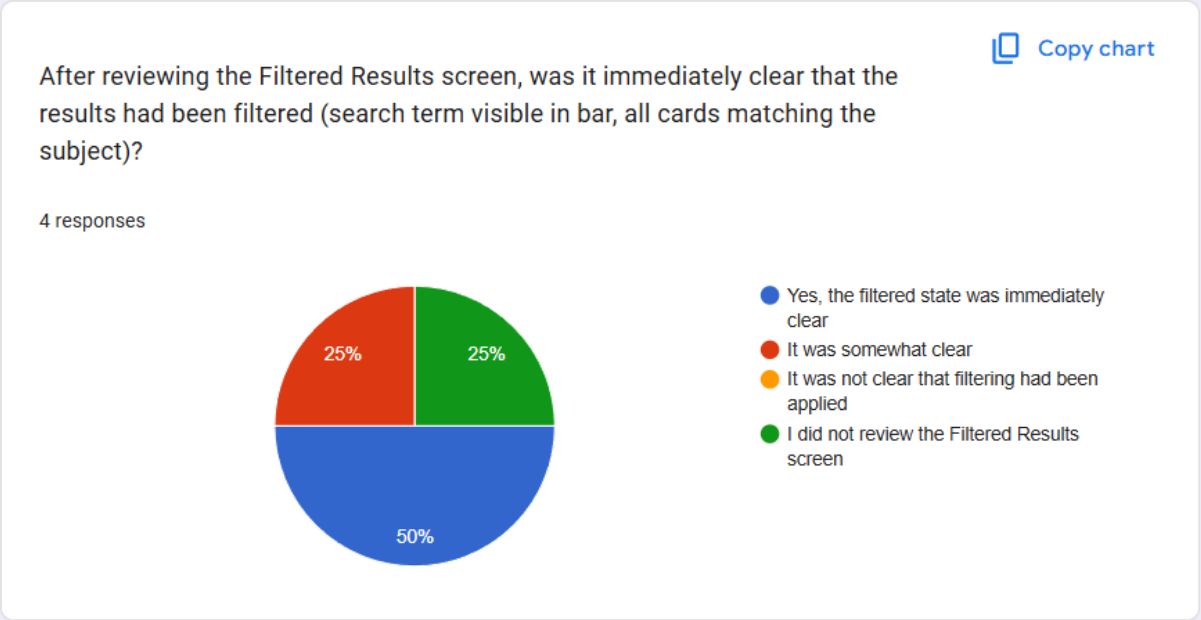


Were the filter options in the **Filter Popup** (Subject, Language, Min Price, Max Price, Stars) sufficient for finding a suitable tutor?

Copy chart

4 responses





What improvements would you suggest for the Sprint 1 screens? (Registration, Sign In, Password Recovery, Search, Filter)

3 responses

- Adding a splash screen before registering/log in
- I expect the search results to be clickable so that we can review the tutor's profiles. And as a student or tutor I want dashboard providing different features like booking a session.
- It's too monotone

Test Summary

Results

Test Type	Total Tests	Pass	Fail	Pass Rate
User Acceptance Testing	20	19	1	95%

Failed Tests

Test ID	Description	Impact	Recommended Fix
10	No error message or error placeholder is visible on the sign in page. Invalid	High; users have no visual feedback when login fails. Without an error message the user	Add visible error message below the login button to the sign in mockup

	credentials state is not represented.	cannot tell whether their username or password is invalid.	

Observations

19 out of 20 Sprint 1 user acceptance tests passed (95%) The singular failure relates to the missing error message area on the sign in screen. All other screens contain the expected elements as defined by user stories.

User feedback results from the Google Form will be recorded in Section 3 once participant responses have been collected.
