TutoConnect Software Testing Document

Software Testing Document

Sprint 3

Section 7, Group 4 | Principles of Software Engineering

Document Type	Software Testing Document, Sprint 3
Testing Type	User Acceptance Testing
Testing Approach	Testers view all screens and verify that visible UI elements match what is expected. No backend or data entry is performed during the test. System and integration testing are not applicable to static prototypes.
Mockup Screens	Splash Screen, Sign In, Registration (role selector), Student Registration, Tutor Registration, Recover Password, OTP Entry, Update Password, Search Page, Filtered Results, Filter Popup, Language Dropdown, Subjects Dropdown, Study Level Dropdown, Side Menu
Roles Evaluated	Student, Tutor
Version	1.0

TutoConnect Software Testing Document 1

Software Testing Document 1

Introduction

Purpose

This document records the results of User Acceptance Testing done on the TutoConnect Sprint 1 prototype mockups. The prototype consists of static screen designs showing the intended UI for each Sprint 1 feature. Tessting is performed by inspecting each screen and verifying that the correct elements are present and functional.

System and integration testing are not conducted at this stage. These testing types require a live backend where flows can be triggered and class interactions can be observed.

Methods

The tester opens the relevant mockup screen and observes what is visible. Each test case states which screen to observe, what elements should be visible based on user stories, and what was observed on the mockup. A pass means that all expected elements are present. A fail meants one or more required elements are missing from the mockup.

Mockup Screens Referenced

- Chat Screen
- Chat File Attachment state
- Booking Calendar (1-on-1)
- Booking Confirmation
- Reschedule/Cancel Model
- Group Session Browser
- Group Session Creation Form
- Payment Screen
- Invoice/Receipt Screen
- Review Submission Form
- Admin Payment Monitoring
- Admin Content Moderation
- Admin Analytics
- Admin Announcement Composer

User Acceptance Testing

Each test references a specific mockup screen. The tester will view the screen and check whether the listed elements are visible as described.

Test ID	User Story	Mockup Screen	What Was Checked	What Is Visible on the Mockup	Status
1	In-app messaging — contact list	Chat Screen	A contacts list panel must be visible on the left side showing contact names, last message previews, and unread message badges where applicable.	Contacts list panel on left side with • Contact names • Last message previews • Unread message badges where applicable.	Pass
2	In-app messaging — conversation view	Chat Screen	A conversation panel must be visible on the right showing sent messages (right-aligned, blue) and received messages (left-aligned, grey) with timestamps.	Conversation panel visible on the right with: • Sent messages (right-aligned, blue) • Received messages (left-aligned, grey) • Timestamps	Pass
3	In-app messaging — input controls	Chat Screen	A message input field, a Send button, and a file attachment icon must all be visible at the bottom of the conversation panel.	Message input field, Send button, and file attachment icon all visible at the bottom of the conversation panel.	Pass

4	File sharing in chat	Chat Screen — file attachment state	A message bubble showing a filename, file size, and a Download button must be visible in the conversation to represent a shared file.	Message bubble present	Pass
5	Booking calendar shows tutor availability	Booking Calendar (1-on-1)	The calendar must show: tutor name and subject at the top, a monthly grid with available slots in white and transparent booked slots, a selected slot highlighted in gray, and a Confirm Booking button.	Calendar shows: tutor name and subject at the top, a monthly grid with available slots in white and transparent booked slots, a selected slot highlighted in gray, and a Confirm Booking button.	Pass
6	Booking confirmation screen	Booking Confirmation	The confirmation screen must show: tutor name, subject, date, time, a Confirmed status badge, a video call link or Join Session button, a Reschedule button, and a Cancel button.	Calendar shows: tutor name and subject at the top, a monthly grid with available slots in green and booked slots in grey, a selected slot highlighted in blue, and a Confirm Booking button.	Pass
7	Reschedule / cancel	Reschedule/Cancel Model	A confirmation model must appear with the	Confirmation model shows: • Session details	Fail

	confirmation model		session details, a note that the tutor will be notified, a Confirm button, and a Cancel button.	• Confirm button • Cancel button.	
8	Group session browser for students	Group Session Browser	A page must show a subject filter dropdown and group session cards. Each card must show: tutor name, subject, date, time, duration, and spots remaining. At least one card must show as Full (greyed out).	Page shows subject filter dropdown and group session cards with: • Tutor name • Subject • Date • Time • Duration • Spots remaining. One card must show as Full (greyed out).	Pass
9	Group session creation form for tutors	Group Session Creation Form	A form must show: Subject dropdown, Title field, Date picker, Time picker, Duration dropdown, Maximum Capacity field, and a Create Session button.	The form shows • Subject dropdown • Title field • Date picker • Time picker • Duration dropdown • Maximum Capacity field • Create Session button.	Pass
10	Group session duration dropdown options	Group Session Creation — Duration dropdown	The Duration dropdown must show options: 30 min, 1 hour, 1.5 hours, 2 hours.	No dropdown	Fail

11	Payment screen session summary	Payment Screen	A session summary section must show: tutor name, subject, date and time, session fee, service fee, and total amount.	Session summary shows • Tutor name • Subject • Date and time • Session fee • Service fee • Total amount.	Pass
12	Payment screen card fields	Payment Screen	Card Number field, Expiry Date field, and CVV field must all be visible on the payment screen.	Card Number field, Expiry Date field and CVV field all visible	Pass
13	Payment screen security indicator	Payment Screen	A Pay Now button and a 'Secured payment' label with a lock icon must be visible on the payment screen.	No lock icon	Fail
14	Invoice screen payment confirmation	Invoice Screen	The invoice must show a 'Payment Successful' confirmation, invoice number, tutor name, subject, session date, session fee, service fee, total paid, a Download Invoice button, and a Back to Dashboard button.	Invoice shows a • Payment Successful confirmation • Invoice number • Tutor name • Subject • Session date • Session fee • Service fee • Total paid • Download Invoice button • Back to Dashboard button	Pass

15	Review submission form	Review Form	The review form must show: tutor name, session date, a 5-star rating selector, a written review text area, and a Submit Review button.	No review functionality	Fail
16	Admin payment monitoring table	Admin Payment Monitoring	A payment table must show columns: Payment ID, Student, Tutor, Amount, Date, Status, Actions. Disputed rows must be highlighted in orange. Status badges must show Confirmed (green), Disputed (orange), and Refunded (grey).	Payment table with columns: • Payment ID • Student • Tutor • Amount • Date • Status • Actions • Disputed rows must be highlighted in orange. Status badges show Confirmed (green), Disputed (orange), and Refunded (grey).	Pass
17	Admin payment action buttons	Admin Payment Monitoring	A Mark Disputed button and a Resolve button must be visible in the Actions column of the payments table.	Mark Disputed button and Resolve button are visible in the Actions column of the payments table.	Pass
18	Admin content moderation category counts	Admin Content Moderation	Category count indicators must be visible at the top showing the number of flagged items in	Category count indicators present at the top showing the number of flagged items in each category: • Flagged Reviews	Pass

			each category: Flagged Reviews, Flagged Messages, Flagged Profiles.	• Flagged Messages • Flagged Profiles	
19	Admin content moderation tabs	Admin Content Moderation	Three tabs must be visible: Reviews, Messages, Profiles. Each flagged item card must show content preview, user name, date flagged, a Remove button, and a Dismiss button.	Three tabs are present: • Reviews • Messages • Profiles Each flagged item card has: • Content preview • User name • Date flagged • Remove button • Dismiss button.	Pass
20	Admin analytics KPI cards and chart	Admin Analytics	4 KPI cards must be visible: Total Revenue, Total Sessions, New Users, Average Rating. A revenue chart must be visible. A date range picker (From / To) and a CSV Export button must also be present.	4 KPI cards present: • Total Revenue • Total Sessions • New Users • Average Rating Revenue chart visible. Date range picker (From / To) and CSV Export button also be present.	Pass
21	Admin announcement composer	Admin Announcement Composer	A Title field, a Message body text area, an Audience dropdown, and a Publish button must all be visible	Title field, Message body text area, Audience dropdown and Publish button visible.	Pass

			on the announcement composer screen.		
22	Admin announcement audience dropdown	Admin Announcement — Audience dropdown	The Audience dropdown must show: All Users, Students Only, Tutors Only.	Audience dropdown shows: • All Users • Students Only • Tutors Only	Pass
23	Admin past announcements list	Admin Announcement Composer	A list of past announcements must be visible below the composer, each showing title, audience badge, publish date, and message body.	List of past announcements must be visible below the composer, each showing title, audience badge, publish date, and message body	Pass

User Feedback

Collection Method

User feedback was collected using the feedback form distributed by Google Forms. Participants were asked to walk though the Sprint 3 prototype screens and answer questions covering messaging, booking, payments and reviews. The form was shared with participants after they reviewed the Sprint 3 mockup screens. All responses are recorded in the feedback form using Google Forms.

User Responses

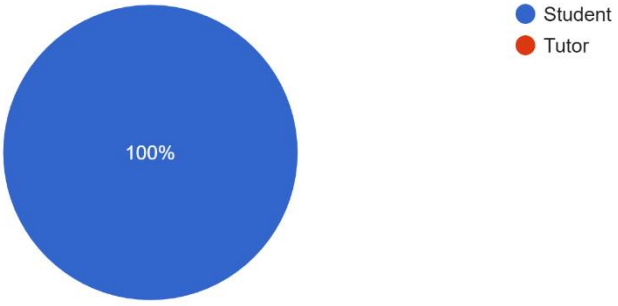
What is your name? (Optional)

6 responses

- Manjarul islam jihad
- Saiful
- Baky
- Ehan
- Emon
- Sayem

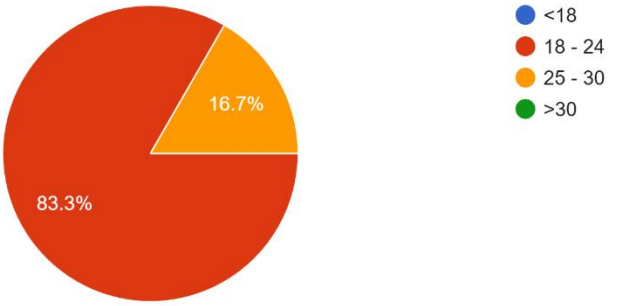
Are you a student or tutor?

6 responses



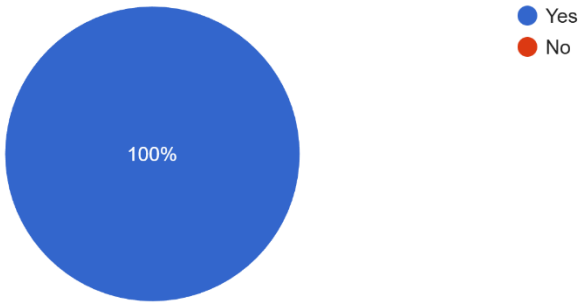
What is your age?

6 responses



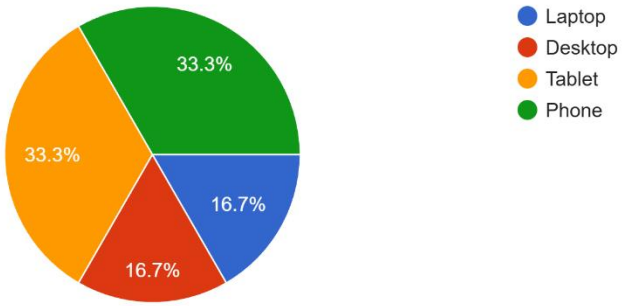
Have you used a tutoring or learning platform before?

6 responses



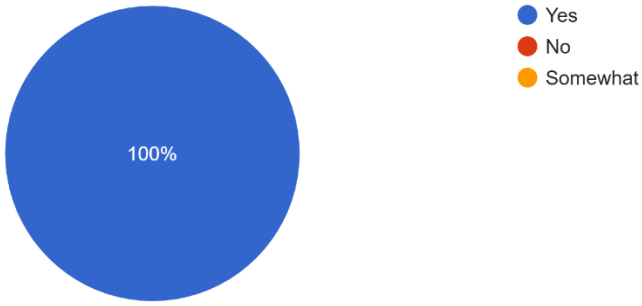
Which device are you using to view the prototype?

6 responses



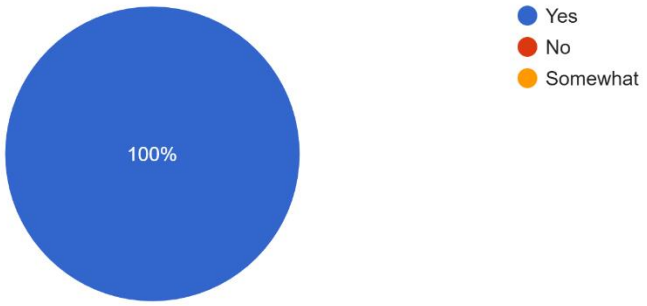
Was the chat interface easy to find from the tutor profile?

6 responses



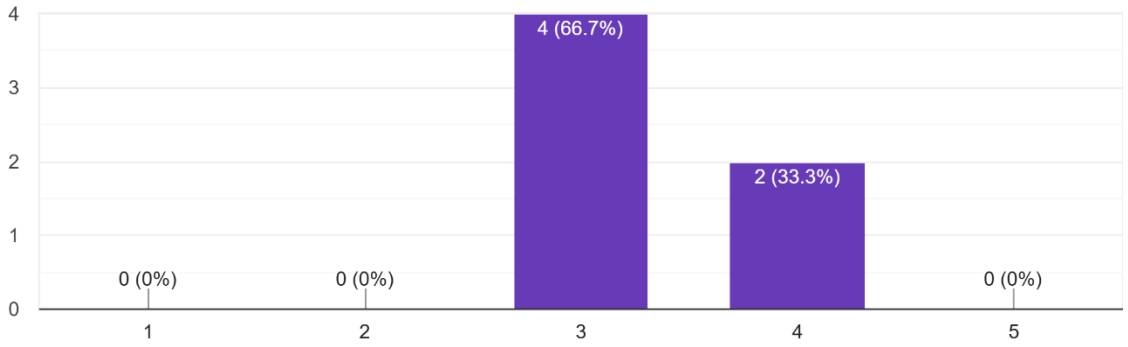
Were the message input and send button intuitive?

6 responses



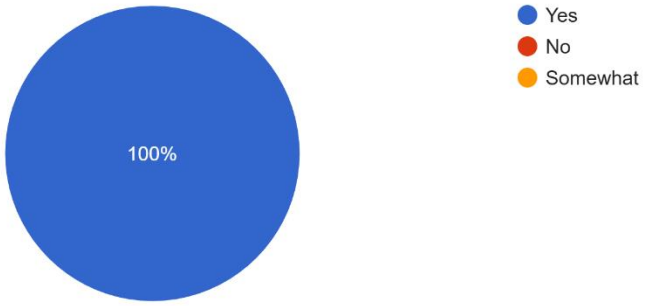
How easy was the booking calendar to use?

6 responses



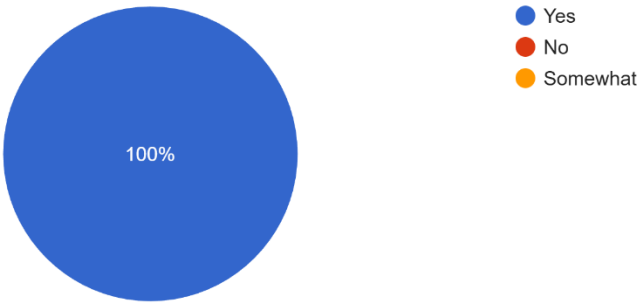
Was the booking confirmation screen clear?

6 responses



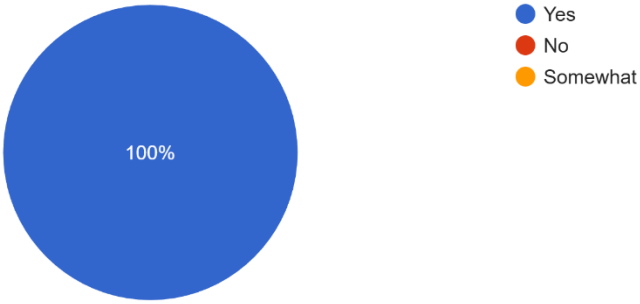
Were the video session controls easy to find and understand?

6 responses



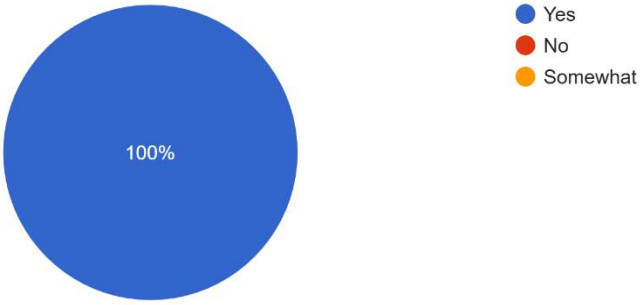
Were the video session controls easy to find and understand?

6 responses



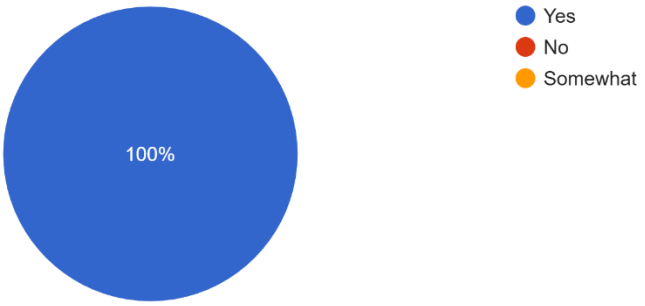
Was the payment page clear and did it feel trustworthy?

6 responses



Was the review submission form easy to use?

6 responses



What is one thing you would improve about Sprint 3?

6 responses

No need

i think no need

It's good

I think good

For now ; no need
