TutoConnect

User Stories: Sprint 1

Section 7, Group 4

Principle of software engineering

ID	Role	User Story	Priority	Acceptance Criteria

1	Student	As a student, I want to create an account, so that can log in.	Must Have	Forms submissions don't have error. Redirection to login page when account creation is done.
2	Student	As a student, I want to add my qualifications when I register so that the tutor has some idea of my academic background.	Must Have	Qualification field present on submission form and saved at submission.
3	Student	As a student, I want to choose the subjects where I need tutoring during sign up and the languages, I can learn it so that the system will find good matches for me.	Should Have	Multi-select subject and languages fields. The subjects and languages selected are visible on student profile.
4	Student	As a student, I want to upload my student ID so that the platform can verify my account.	Should Have	File upload available on the form. File stored against the student account.
5	Tutor	As a tutor, I want to register and list the subjects along with the languages in which I teach so that students can find relevant tutors based on their needs.	Must Have	Tutor form includes fields for subjects and languages. Values saved when forms are submitted.
6	Tutor	As a tutor, I want to upload my qualifications so that students can know my background.	Should Have	Field for files upload for the qualifications on the registration field.
7	Student or Tutor	As a registered user, I want to log in using my email and password.	Must Have	Correct credentials redirect user to dashboard. Wrong credentials show an error message.
8	Student or Tutor	As a user, I want a Remember Me checkbox so that I do not have to log in from scratch every single time I open the site.	Could Have	Checkbox present on the login portal. Session stays active if it's ticked.
9	Student or Tutor	As a user, I want a Forgot Password link on the login page so that I can recover my account if I lose my password.	Should Have	Clearly visible link. Clicking starts password recovery flow.
10	Student or Tutor	As a logged in user, I want a logout button so that I can properly close my session when I am done.	Must Have	Logout button present on the nav bar. Clicking it triggers the end of the session.
11	Student	As a student, I want search for tutors by subjects or keyword so that I can find relevant tutors.	Must Have	Working search bar. Query submission returns a tutors list that matches.
12	Student	As a student, I want to filter search results, by subject, price range and rating so that I can narrow my search.	Must Have	A sort of drop down that allow to select different filtering options.

Functional Requirements

1. Students can register with name, email, username, password, institution, qualifications, subjects, languages, and student ID upload
2. Tutors can register with name, email, username, password, institution, subjects taught, languages, qualifications upload, and session type per subject
3. Users can log in with email and password
4. System displays an error message for wrong credentials
5. Users can log out and their session ends
6. A Forgot Password link is available on the login page
7. A Remember Me option keeps the session active
8. Students can search for tutors by subject or keyword
9. Students can filter search results by subject, price range, and rating
10. Search results display tutor cards with name, subjects, languages, rating, and session type

Non-Functional Requirements

1. Passwords must be hashed before being stored
2. All form fields must be validated before submission
3. Error messages must be clear and specific
4. Pages must load within 3 seconds
5. The platform must work on Chrome, Firefox, and Edge
6. The interface must be consistent and easy to navigate
7. Session must expire after a period of inactivity
8. Student ID and tutor certificate uploads must be stored securely
9. The system must prevent duplicate email registrations
10. Input fields must be protected against basic injection attacks
